

HiredScore AI for Talent Mobility.

Deliver on your employee growth and development agenda.

Empower employees to be aware of the right job and growth opportunity at the right time while enabling managers and HR leaders to drive internal mobility and retention goals.

We often hear it's easier for employees to find jobs externally than internally—proven by the fact that only 33%¹ of employees who are searching for a new job look internally first. Many employees don't have time to continually watch for new open roles, resulting in dissatisfying internal candidate experiences and processes. It's equally challenging for managers to keep up with possible career pathways for their team, making it difficult to support employee growth and development.

Take the friction out of internal mobility and make it easier for employees to find new opportunities internally whenever possible. HiredScore AI for Talent Mobility with Workday delivers high-converting job recommendations in the flow of work; incorporating your company's mobility policies and holistic data such as employee interests, skills, time-in-role, and performance. Empowering employees to explore, apply to, and advance in roles within the organization helps improve retention while leveraging existing skills and knowledge, fostering a more engaged and loyal workforce.

Jobs that come to employees.

Employees receive highly relevant internal job opportunities directly within their existing workflow of MS Teams or email—eliminating the need to navigate internal application systems. Workers can choose to apply directly without leaving MS Teams, dismiss the recommendations, or further explore opportunities in the Workday career hub. Smart alerts notify employees of the additional opportunities they could receive once they complete their profile, including suggestions based on location preferences, prior experience, and capabilities. This interactivity highlights the "what's in it for me" aspect for the employee, driving continuous optimization and personalization of recommendations and enriching your employee dataset within Workday to drive a better employee experience.

Guided mentorship and career coaching.

Managers and HR business partners gain access to tailored job opportunities and status updates to mentor employees and provide one-to-one career coaching. Managers can proactively look for open opportunities for their team members directly within their MS Teams workflow to help facilitate important conversations about career progression. *Please note this is an additional implementation cost.*

Key Benefits

- Personalized matching: Al-powered, highly curated matching of employees to open roles
- Intuitive user experience: Proactively meets employees in the flow of work via MS Teams or email
- Employee satisfaction: Workers can navigate and apply to internal opportunities without adopting new tools
- Data-driven insights: Reporting enables talent and people analytics leaders to track employee progress and inform next steps

Key Features

- Employee career guide via MS Teams or email
- Employee data optimization linked to the Workday talent profile
- Tailored employee matching and communications
- Real-time notifications and alerts
- Internal mobility dashboard
- Manager moderated talent mobility*

*Additional implementation cost

Results

- 30% increase in internal application rates when contacted via Al-driven notifications
- 1.4x better-quality candidates compared to external applicant pool
- 18.75% increase in internal employees hired or in process of getting hired for a new role
- 2.3x increase in likelihood to move when provided tailored recommendations
- 5% improvement in employee retention when employees were encouraged to apply for internal jobs
